

BRIDGE THE GAP BETWEEN ENGINEERING AND PUBLISHING

CHALLENGE

- Heterogeneity of formats, models, and templates.
- Lack of unified documentation production process due to asynchronous versions of tools.
- Impossibility to trace content evolution throughout the documentation production lifecycle.

BENEFITS

- Efficient and automated documentation lifecycle management.
- Documentation quality and consistency through synchronization of content across design and documentation phases.

SOLUTIONS

- A Hub of links offering sophisticated content modeling and structuring capabilities.
- Dynamic linking of fragments across deliverables.
- Incremental updates that guarantee highly reliable and consistent content.
